THE HOLLAND BULB GARDENS Fall, 1939

TERMS AND INSTRUCTIONS, FALL 1939

1.—**REFERENCES.**—We refer new customers for our bona fides to our bankers, Messrs. Brown Bros., Harriman & Co., 59 Wall Street, New York City. Our firm was established in 1868 and has been in the American trade for over forty years.

2.—**GUARANTEE.**—We guarantee all our stock to be true to name and of extra selected and highest quality, to be delivered in sound and healthy condition at destination. Shortages, damages or defects should be reported immediately upon unpacking.

3.—**PRICES.**—Prices are F.O.B. New York City. These cover all charges, clearing from Customs, etc. Forwarding charges from New York are met by customers.

4.—**PAYMENTS, DISCOUNTS, ETC.**—All orders amounting to less than \$10.00 are cash with order. Orders for \$10.00 or more, if desired, can be accepted at 25% with order and balance C.O.D. To out of New York cheques add 15 cents exchange. All accounts are payable in U.S. money only. We pack a nice premium for all cash-with-order orders for \$10.00 or over, besides which we allow 5% discount for cash with all orders amounting to \$10.00 or more. As the cost of handling and clearing small import orders is relatively very high, **orders amounting to less than \$5.00 cannot be accepted, except with an extra handling charge of 30 cents.**

5.—**IMPORT ONLY.**—We do not carry stocks in New York. We import only what is ordered. Orders can be accepted until **September 20th**, and delivery is made in about 6 weeks. We can cable for any Parcel and Case lots up to October 5th and make delivery in about four weeks.

6.—**GROUP ORDERS.**—We have many groups of customers, in offices, schools, factories and garden communities who combine their orders in one, thus saving charges. The individual orders are packed and labelled separately at no additional charge, provided each individual's order is for a reasonable amount, say at least \$2.00. Group orders should be in early.

7.—**COMPLAINTS.**—Shortages, damages or defects should be reported immediately upon unpacking. Post-season complaints cannot be considered. Orders are accepted and executed conditional on strikes, accidents, changes in tariffs and governmental regulations.

RATES FOR DIFFERENT QUANTITIES OF BULBS

With the exception of a few specially high-priced varieties for which the price is given for a single bulb, **orders are not filled for less than five bulbs of a variety.**

The Prices listed in this catalogue are for 10 and 100 bulbs. 25 bulbs are sold at the 100 rate proportionately. For 5's—add 10% to the 10 rate. 1,000 bulbs of one variety are sold at 100 rate less 10%.

“ I want to let you know what wonderful luck we have had with your tulip bulbs. They have been admired by so many people, even those passing by just stopped and asked where they came from. . . . I will say all the bulbs around here are fully one-third or fourth smaller than those from The Holland Bulb Gardens. . . .”

Kentucky.

MRS. JOHN BACH.

“Your tulips are excellent and everyone who has visited my garden has asked where I get my bulbs. I know that several of them have actually purchased some bulbs from you.”

Michigan. July 20th, 1938.

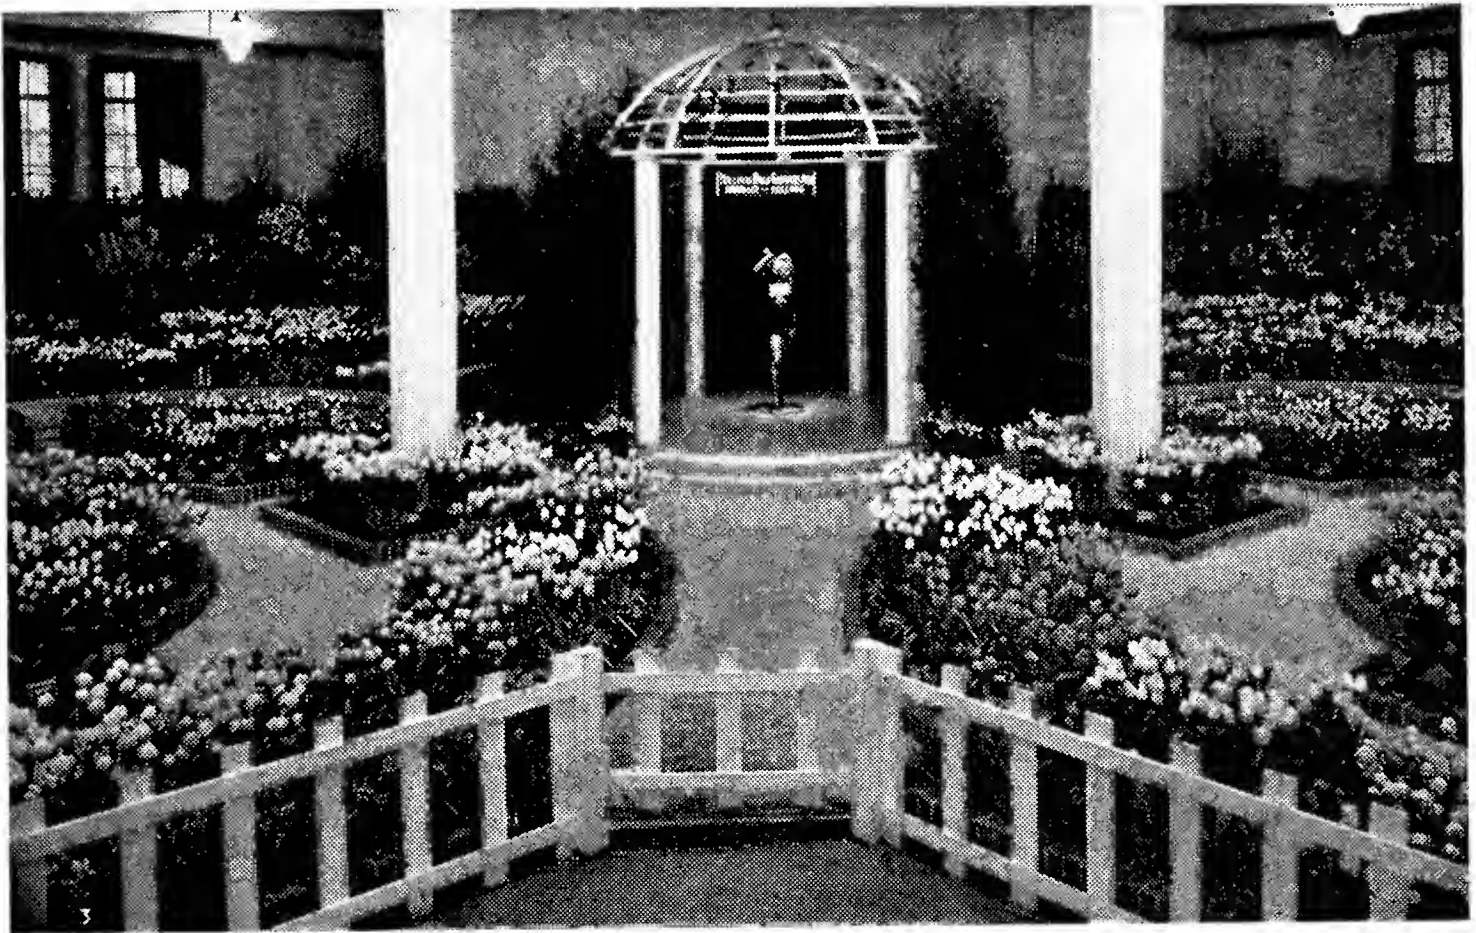

THEODORE R. ZIEFLE.

“ in that way you will receive many orders, as the bulbs I have received from you have been perfectly beautiful and much admired by my friends.”

Connecticut. July 19th, 1938.

MRS. ROBERT MUNGER.

JOIN WITH YOUR FRIENDS IN A GROUP ORDER

The entrance to the exhibit of the Holland Bulb Growers Association at the National Flower and Garden Show, held in March, 1938, in Toronto.

To All Our Customers and Friends

We have again much pleasure in handing you our Catalogue for Fall Bulbs for the season 1939, at the same time thanking everyone who favored us with their esteemed orders in the past season. In our Catalogue you will find listed the well-known and popular varieties, as well as the latest novelties, and we hope that the perusal of this booklet will induce you to add more flowerbulbs to your collection, or to start to grow some of these, if you never enjoyed the beauty of Tulips, Daffodils, Hyacinths, etc., in your garden before.

Thousands of visitors admired our Exhibit at the National Flower and Garden Show in Toronto in the Spring of 1938, and this stimulant to flower-lovers and amateur gardeners proved such, that our sales during the 1938 season showed a definite increase over previous years. We are grateful for the continued confidence our customers are showing, and also hope that our ceaseless efforts to improve our service and to supply only the choicest quality of flowerbulbs, will justify your further patronage.

In order to help us serve our patrons in a still better and quicker way, we obtained another and larger property, since 215 Glenholme Avenue did not give sufficient facilities any more to handle our increased business, and we are glad to announce that at our new address,

40 OAKMOUNT ROAD, TORONTO 9,

we will be able to show next Spring various new varieties of all kinds of bulbs during the flowering season, so as to enable our customers to see and make their choice of the varieties they would like to grow themselves. It is our joy to help beautify your Gardens by supplying our customers with bulbs, which are bound to produce an abundance of flowers and bring happiness and beauty to you every Spring. Many bulbs may be forced into bloom indoors during the Winter, thus prolonging their charms from Christmas till late May.

We like to thank all those who recommended our goods to their friends, and wrote us in regards to the success they had with our bulbs and the prizes

they won at various local flowershows. We certainly appreciate your kind words about our service and quality of goods, and we will continue to do our best to show that we are worth your confidence.

All orders are made up in Holland by our skilful staff, thus avoiding rehandling of the goods on this side, which might be harmful for flowering results. All our goods are backed up by our guarantee to be top size, sound and true to name, and to arrive in perfect condition.

Please share this catalogue with your friends, or still better, let us have their names, and we will be only too pleased to send them a copy.

Sincerely yours,

THE HOLLAND BULB GARDENS,

40 Oakmount Road, Toronto, Ont.

95 Broad Street, New York City.

June, 1939

Parcels of Rock Garden and Miscellaneous Bulbs

We list here the Parcel Lots made up of assortments of bulbs of different kinds. To hundreds of individuals and groups of neighbors these Parcel Lots have proven very acceptable as introductory and educational selections. The quality is the best H.B.G. quality and the selections are choice.

To avoid misunderstanding read Terms and Instructions carefully.

TULIPS

The Classification of Tulips

As the Tulip has been a very popular garden flower and in large commercial demand for over 250 years, there has naturally been a great production of varieties. The number of varieties listed in Holland catalogues, all told, approaches the 2,500 mark. Their classification is therefore complicated, and more or less artificial. A committee of the Royal Horticultural Society of England in 1917 drafted a classification, which is briefly explained in the descriptions given in our catalogue, in the belief that tulip growers will be interested and helped to a better understanding of the characteristics of varieties. According to the R.H.S. classification, Tulips are divided into three classes:

I. Native, or natural-growing species. II. Early Flowering. III. Late, or May Flowering.

The native species of Tulips are those original native species growing in Europe, Asia, England, etc. It is from these that the numerous horticultural varieties have been derived.

The Early Flowering Tulips comprise: (1) Single Early Tulips; (2) Double Early Tulips; (3) Duc Von Tholl Tulips.

The Late or May Flowering Tulips comprise groups known as: (1) Darwins; (2) Breeders; (3) Cottage Tulips; (4) Parrots; (5) Rembrandts; (6) Byblooms; (7) Bizarres; (8) Late Double Tulips; (9) Lily Flowered Tulips; (10) Mendel Tulips; (11) Triumph Tulips; (12) Ideal Tulips.

Darwin Tulips

The culture of these Late Tulips has developed in recent years into a fad amongst flower growers, as their beauties and merits have become recognized. They were named in 1889 after the great English naturalist, Charles Darwin. Some years previous they had been originated by an unknown amateur, in the north of France.

The bloom is borne on strong, stately stems 18 to 30 inches in length. Their range of colors embraces almost every conceivable tint of rose, heliotrope, claret, maroon, crimson and rich shades of purple approaching a black and Yellow and White Darwins have been developed also. The flowers of Darwin Tulips are large, globular and of heavy texture. As cut flowers they are much used and very satisfactory. They are most valuable for permanent planting in borders and amongst shrubbery. They show best in clusters, and will continue to bloom for years.

From the many hundreds of varieties on the market, we list only the following varieties. We can commend the selections as containing the best of the best. For customers, unacquainted with varieties, we recommend the purchase of Parcel Lots.

The letters E, M and L used in the descriptions, represent Early, Medium and Late respectively. The numbers represent the height in inches. It is hardly necessary to state that these letters and numbers suggest only the **approximate, relative and probable** time of blooming and heights.

Favorite varieties are printed in capitals. This does not mean, however, that the other varieties are less desirable or attractive. It means only that those printed in capitals are popular favorites and well recommended.

Why not order now? It is not too early.

Hints on Forcing Darwins

Darwins may be forced for Winter bloom if brought to the heat not earlier than the end of January. They will bloom about the first of March. Most varieties, but especially the violet-colored sorts, have their colors softened down in forcing. They should be forced slowly in a moderate temperature. The bulbs require more room than those of Single Early Tulips and deep pans or pots should be used. The varieties suitable for forcing are marked with an asterisk.* The varieties most commonly seen in florists' shop windows in the Winter are Bartigon and Wm. Pitt (red), Princess Elizabeth and Le Notre (pinks), Wm. Copeland (mauve).

A Bulb

*"I placed it in the earth—this bulb of mine—
And from its narrow prison house of night
It struggled forth to reach the air and light;*

*And as it rose and blossomed to the sight,
Its absolute perfection seemed divine!"*

—I. G. Ascher.

Breeder Tulips

These Late or May-Flowering Tulips are also called “selfs”, or “self-flowers”, because of their bloom being of one solid natural color, except for the base of the petals. They comprise the “unbroken” forms of the old Florist Tulips. The flowers are of dull neutral shades of red and yellow, brown and orange, lilac, rose and violet, while their inside coloring is beautiful and brightly glowing. They are of vigorous growth and enormous size, equalling in substance and structure the Darwin Tulips. They are not uncommonly called the “Art Tulips” because of their “art shades” coloring. Planted together with Darwin and Cottage Tulips, a most artistic effect will be obtained. Those varieties of the Breeders suitable for forcing should be forced very slowly only.

The varieties listed below comprise those which in our opinion will give the best assurance of pleasure and satisfaction. The Parcel Lots can be commended to those who are not acquainted with varieties.

PARCEL LOTS OF BREEDERS

NOTE—A parcel of 100 Breeders weighs about 7 lbs.

each .20		
172	Named Pink and Rose Sorts, our choice, 100 parcelled in 25's		3.50

Cottage Tulips

This class of Late or May-Flowering Tulips comprises a miscellaneous catch-all group of old-fashioned tulips that had been grown for generations in the cottage-gardens of England and Europe. They have been much improved in recent years through selection and hybridization, so that now they are beginning to rival the Darwins in popularity. All colors are represented, of striking tints and shades. They are similar to Darwins in their habits of tall growth, but have their petals more open. Many of them are fragrant and some have drooping heads. Yellow sorts, which are not represented in the cheaper Darwins, are prominent. They are very hardy, and if undisturbed in good soil will increase and flower for many years. In forcing, care must be taken to bring them on slowly.

PARCEL LOTS OF COTTAGE TULIPS

†No. 1	50 COTTAGE TULIPS, superfine mixture, all colors represented	\$1.60
†No. 2	100 COTTAGE TULIPS, superfine mixture, all colors represented	2.75

239	Zomerschoon, E-20, carmine rose, striped pure whiteeach .25		

Single Early Tulips

These are probably the best known Tulips. They are the popular Tulips for early garden bloom and are commonly used for formal beds in parks, about public buildings and for memorial beds. Their brilliant colors are unsurpassed. They may be planted outdoors any time from the 1st of October until the ground freezes. As bedding plants they have this advantage, that they are through flowering early enough to be lifted and replaced by summer blooming plants.

They are no less popular for forcing for indoor winter bloom. The best varieties for forcing are marked with an asterisk*.

For customers who may be unacquainted with varieties, we recommend the purchase of the Parcel Lots listed below. Customers who wish to have other varieties than those listed here will be accommodated at fair market price.

PARCEL LOTS OF SINGLE EARLY TULIPS

Double Early Tulips

The Double Early Tulips produce very attractive color effects in bedding as well as in pots and pans. Well grown, they look like small-sized peonies. As their heavy blooms may be spoiled by winds and rain, it is advisable in outdoor planting to grow them where they may have some protection. Every one of the varieties listed below is highly recommended.

The Double Early Tulips last much longer in bloom than the Single Early Tulips. Those marked with an asterisk are very suitable for forcing for winter bloom. They should be forced more slowly than the Single Early Tulips. To those unacquainted with the varieties named, we recommend the purchase of our Parcel Lots.

PARCEL LOTS OF DOUBLE EARLY TULIPS

NOTE—A parcel of 100 Double Early Tulips weighs about 6 lbs.

†No. 1	50 D.E. TULIPS, superfine mixture, all colors represented	\$ 1.75

Various Kinds of Tulips
Bybloom and Bizarre Tulips

The Byblooms and Bizarres were formerly listed amongst the "Old Dutch Florist Tulips". It was this race of Tulips that was involved in the famous Tulip craze of 1635. They are a late flowering group with very attractive stripes. Their quaint colorings adapt them for display by themselves in out-of-the-way places in the border. Their bulbs are smaller than those of the Darwins and other well-known Tulips.

	Per 10	Per 100
352 Superfine Mixture, all colors and types represented	\$.55	\$5.00
353 Parcel of 100, 20 each of 5 favorite named varieties, representing Bybloom Roses, Bybloom Violets and Bizarres		6.00

Late Double Tulips

The Double Late Tulips range taller as a rule than the Double Early Tulips, but not so tall as the Darwins. They are late flowering.

		Per 10	Per 100

364	Superfine Mixture, all colors represented65	5.50

Lily Flowered Tulips

This is a very attractive novelty class of Tulips that has been developed in recent years from the crossing of the Cottage Tulip Retroflexa, with a pink Darwin. With the pointed retroflex petals of their Cottage ancestor, they have the appearance of the flower of a lily. They are classified among the Late or May-Flowering Tulips. The bloom is large and substantial.

		Per 10	Per 100

377	WHITE DUCHESS, pure white, yellow anthers.....each .10		
378	Superfine Mixture, all colors represented50	4.00

Mendel Tulips

The Mendel Tulips are a recent development. They have been produced by crossing Darwins and Duc van Tholl Tulips and have the size, substance and shape of the Darwin and the disposition to earliness from the Duc van Tholl ancestry. They are called after the famous Mendel, whose studies in heredity laid the foundation for scientific plant breeding. They may be described as Early Darwins and bloom between the time of the Single Early Tulips and Darwins.

406	Parcel of 100, 10 each of 10 named varieties		4.00

Parrot Tulips

These Tulips are also called Dragon Tulips. The bud, just before opening, has an appearance like a parrot's or dragon's head. Their petals are feathered, twisted and lacinated or slashed. Green shades show amongst their brilliant colorings. Their height varies from 15 to 20 inches, and they bloom after the Double Tulips. To obtain a good display of flowers, plant close together, when their striking brilliance will make a wonderful effect in protected parts of the border as they are very decorative.

Parrot Tulip Fantasy

		Per 10	Per 100
409	Admiral of Constantinople, a bright showy orange-red	\$.35	\$3.25

422	Parcel of 100, 20 each of 5 named varieties		3.50

Rembrandt Tulips

These Late or May-Flowering Tulips are a strain of variegated Darwins technically known as "Broken Darwins". Broken Tulips are "freak" tulips showing mosaic color effects in irregular stripes and streaks in the flowers. The contrasts are very wonderful and striking. Flowers are not so large nor so tall as the Darwins. They are hardy, and to make a display they should be planted by themselves when they are remarkably attractive; they fit in with the Byblooms. Their family name is derived from the fact that they are often seen in the famous paintings of old Dutch masters.

		Per 10	Per 100
423	Superfine Mixture, all colors represented	\$.55	\$5.00
424	Parcel of 100, 10 each of 10 named varieties		6.00

Triumph Tulips

The Triumph Tulips are a new race. They are the progeny of crosses between Single Early Tulips and Darwins, and bloom about one week later than the Single Early Tulips and before the Darwins. They have the tall, strong stems of Darwins and as in the case of Mendel Tulips, the earlier blooming habits of the Single Early Tulips. All colors are represented in this class.

		Per 10	Per 100
*425	ALBERIO, cerise-red, slight yellow edge, very large, good forcer	\$.50	\$4.50
*426	Algiba, clear heliotrope color, lighter edge50	4.50

Tulipa Species

The "Tulipa Species" are the original native forms of Tulips from which all the highly developed horticultural varieties have been derived. Their native habitat is chiefly Central Asia and Asia Minor. The genus exhibits a great range of variation in color, shape, form and season of bloom. The plants are nearly all small flowered and low, usually about eight to ten inches high. From a long list we select these species that should prove of interest to gardeners or botanists to study original forms.

Very suitable for rock gardens.

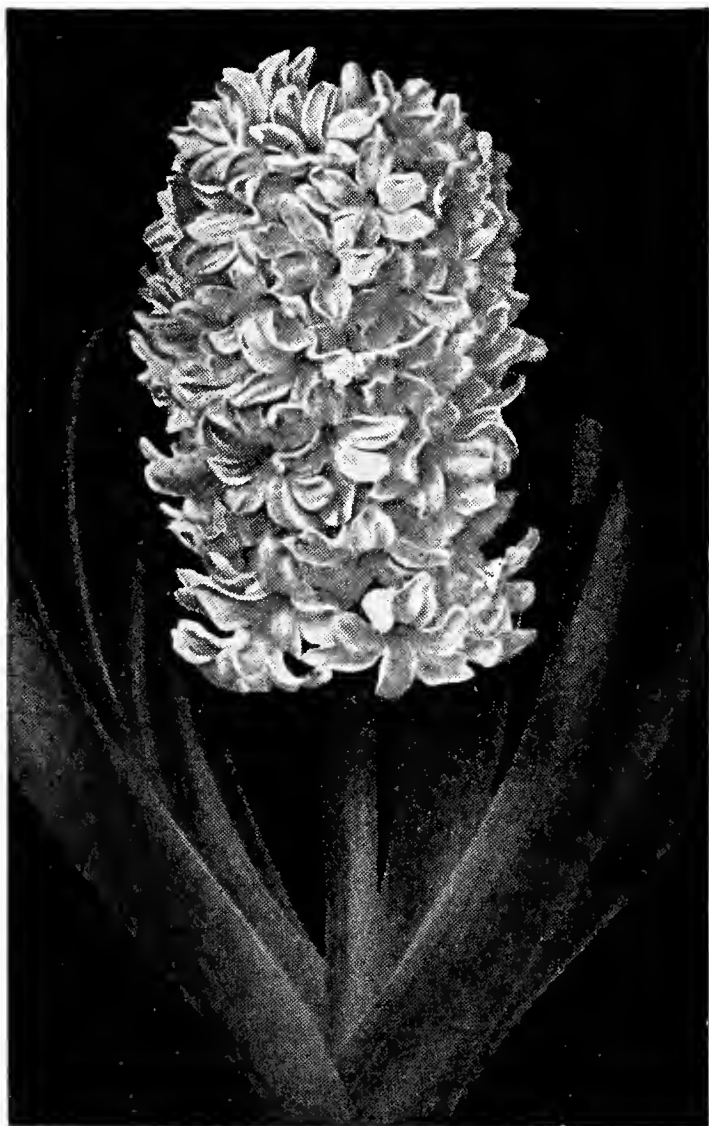

Tulipa Eichleri

		Per 10	Per 100

HYACINTHS

Little need be said about the beauty of these Dutch Bulbs. They are very commonly grown and universally admired, and are favorites for Winter bloom, grown either in pots or in water. The Single Hyacinths are more popular than the Double Hyacinths, and all varieties are suitable for bedding.

Smaller Sized Hyacinths can be grown very successfully in gravel and water. Plant same way as Paper-white Narcissus. This is an easy and clean way.

PARCEL LOTS OF SINGLE HYACINTHS

*No. 1	8 TOP-SIZE EXHIBITION HYACINTHS, for forcing, 1 each of 8 choice named single varieties in a range of different colors	\$1.25

506	Grand Monarque, clear blue, flowers of great substance, excellent forcer
507	Ivanhoe, new, indigo blue.....

Do not forget to order some Hyacinths for winter blooming.

Hyacinths Gertrude at our Limmen Nurseries

SINGLE BLUE HYACINTHS (Continued)

- 508 KING OF THE BLUES, deep glossy blue, shapely large spike on short stem.....
- 509 Marie, deep purple-blue, slightly white striped, large spike
- 510 MYOSOTIS, Forget-Me-Not blue, very large fine flower
- 511 Perle Brilliant, light blue, outside of bells shaded darker blue, tall with large spikes.....
- 512 QUEEN OF THE BLUES, fine light blue with beautiful silvery shade, large spike.....
- 513 Royal Blue, new, distinct blue.....price—20% higher
- 514 SCHOTEL, porcelain blue, fine, large spike, good forcer
- 515 Named Blue Sorts, our choice, put up in 25's at prices listed for different sizes.....

SINGLE YELLOW HYACINTHS

- 518 CITY OF HAARLEM, bright golden yellow, large, well-formed spike, best yellow.....
- 519 KING OF THE YELLOWS, very bright yellow, tall handsome spike, excellent pot Hyacinth.....
- 520 Orange Boven, deep orange-salmon, very striking color
- 521 PRINCE HENRI, clear yellow, fine for forcing.....
- 522 YELLOW HAMMER, pure golden yellow, compact spike like hammer head, forces easily.....

SINGLE PURPLE AND VIOLET HYACINTHS

- 525 Distinction, dark maroon, very distinct.....
- 526 Lord Balfour, dark lilac, large broad truss, large waxy bells
- 527 MAUVE QUEEN, extra attractive mauve on a good spike
- 528 Purple King, beautiful violet lilac, large trusses.....
- 529 Queen of the Violets, mauve, a sport of King of the Blues
- 530 Sir Wm. Mansfield, deep lilac violet.....

Avoid dry hot rooms at 70° and over in forcing Hyacinths.

Double Hyacinths

Double Hyacinths are not so highly thought of, nor so commonly used as Single Hyacinths. As a rule they have a smaller bulb than Single Hyacinths and yield a smaller spike. The range of colors is about the same as that of the Single Hyacinths, namely, white, pink and red, light and dark blue, yellow.

		Per 10	Per 100
531	First Size Double Hyacinths, any color desired or mixed	\$1.75	\$16.00
532	Forcing or Bedding Size Double Hyacinths, any color desired or mixed	1.10	10.00

Prepared Hyacinths

These so-called "Prepared Hyacinths" are lifted early from the fields and specially treated by very carefully controlled heating. This puts forward the bud development without injury and permits the grower to force the plants into bloom a few weeks earlier than would be possible otherwise. Instead of getting Hyacinths into bloom about the first of February, the use of Prepared Hyacinths permits one to have them about the first of January.

Supplied in First and Miniature sizes only.

		Per 10	Per 100
533	Prepared Hyacinths, 1st size, any color desired or mixed	\$1.60	\$15.00
534	Prepared Hyacinths, miniatures, extra size, any color desired or mixed70	6.00

NARCISSI and DAFFODILS

We are very pleased to be able to announce that we can import Narcissi and Daffodils again into the United States this year. We have a splendid stock ourselves, and therefore are in a position to supply our American Friends with the very best at attractive prices. We list only a few varieties, however, if you are interested in other or newer kinds, we will only be too pleased to give you our prices.

All Narcissi and Daffodils are supplied in top-size double nose bulbs, except when otherwise stated. Top size bulbs produce from 2 to 5 flowers.

PARCEL LOTS OF NARCISSI

No. 1	50 NARCISSI (and DAFFODILS), in 5 named sorts, first quality mother bulbs, suitable for forcing or growing outdoors	\$2.75
No. 2	100 NARCISSI (and DAFFODILS), 10 each of 10 choice named varieties, separately parcelled; first quality mother bulbs	5.00
No. 3	100 TRUMPET SORTS, in 10 named varieties of Bicolors, white and yellow Trumpets	5.50
No. 4	100 SHORT CUPPED SORTS, in 10 named varieties of Incomparabilis, Barrii, Leedsii, Poeticus, etc.	4.25
No. 5	NATURALIZING MIXTURE, 100 bulbs of flowering size, for naturalizing in woods, etc.	2.75

CASES OF NARCISSI

*575	Top Size (Mother Bulbs), producing about 3 flowers85	7.50
576	First Size Double Nose55	5.00
*577	Wagner's Rheingold, a most perfect shaped flower, deep yellow, excellent forcereach .25		

For 5's add ten per cent to ten-rate.

Barrii Daffodils

The cup (chalice or crown) of the Barrii is relatively very short. It is less than one-third the length of the perianth segments. The bright contrasting colors of the cup make them very attractive.

		Per 10	Per 100
595	Bath Flame, large flowers, yellow perianth with frilled orange cup, red edged	\$.60	\$5.25
*599	EARLY SURPRISE, white perianth, orange-red cup, free flowering, early forcer45	4.00
*601	FIRETAIL, fiery red cup like a Poeticus, white petals, shapely	each .15	
*603	LADY MOORE, ivory-white perianth, yellow cup, red edge75	6.50
*604	Marion, deep yellow perianth, frilled cup of bright orange-red	each \$1.75

*608	Mrs. John Blokker, white perianth, large broad orange scarlet cup	each \$1.25	
*610	NURSEMAID, new, pure white saucer, red cup85	7.50
613	Yellow Poppy, soft yellow, flat red bordered cup75	6.50

Incomparabilis Daffodils

The cup (chalice or crown) of the Incomparabilis Daffodils is larger than that of the Barrii Daffodils. It measures from one-third to nearly equal the length of the perianth segments. Like the Barrii they are much favored for cut flowers, for borders and for forcing.

		Per 10	Per 100
*618	BRIGHTLING, creamy white perianth, large frilled orange cup, long stems	each .10	
*619	CROESUS, showy orange-red cup, lemon-yellow saucer	\$.75	\$6.50
*622	HELIOS, novelty, large orange yellow cup, perianth primrose75	6.50

*631	Sirius, novelty, yellow perianth, immense deep orange trumpet, free flowering	each .40	
*632	SIR WATKIN, sulphur-yellow perianth, cup yellow tinged with orange, one of the older types75	6.50

Apply for Special Prices on large quantities.

Leedsii Daffodils

The factor determining the classification of the Leedsii is color mainly. The Leedsii comprise all the cup-shaped forms that have their cups white, cream or pale primrose, and their perianths white.

		Per 10	Per 100
637	Daisy Shafer, enormous flowers on tall stems, white perianth, deep yellow trumpet-shaped cup, each \$1.50		
*641	SOUTHERN GEM, perianth white, large soft yellow cup	\$.50	\$4.25
*643	WHITE LADY, a favorite, shapely white perianth, dainty pale canary cup, very useful for naturalizing or massive bedding	.50	4.25
*644	White Nile, pure white, very large	each .25	

Poetaz Daffodils

The Poetaz Narcissi are a bunch-flowered class that yearly grows in favor. They have been produced by crossing Poeticus Ornatus and various Polyanthus forms. The individual flowers partake of the characters of the Poeticus parent and the bunching habit is derived from the Polyanthus parent. The plants are vigorous, sweet scented and suitable for growing in borders. Some of the varieties can be forced.

		Per 10	Per 100
*651	Canary Bird, early yellow, very free flowering	\$.85	\$7.50
*652	CHEERFULNESS, the double Poetaz, see Double Daffodils	.75	6.50

*655	LAURENS KOSTER, pure white perianth, yellow cup, free flowering, extra forcer	.60	5.50
*656	L'Innocence, pretty white perianth, orange eye	.85	7.50
*658	ORANGE CUP, soft yellow with orange cup edged red, highly recommended	1.00	9.00
*660	Scarlet Gem, deep yellow, with brilliant orange-red eye, free flowering	each .15	

Poeticus Daffodils

This group is known as the Poet's Narcissus or Daffodil. All Poet's Narcissi have pure white perianths and very short flattened lemon-colored cups, rimmed with orange or scarlet. Sometimes there is a more or less green eye in the centre of the cup. They are commonly used for naturalizing and do well in borders.

		Per 10	Per 100
*665	Actea, the most perfect Poeticus, snow-white perianth, deep scarlet cup, tall, fine for forcing	each .25	
*666	Beauty of Limmen, white perianth, large intense crimson eye, enormous flowers of a faultless shape on very tall stems	each .40	
669	Horace, broad snow-white perianth, blood red eye	\$.55	\$4.50
670	Mrs. John Scheepers, one of the largest Poeticus, pure white, deep red eye	each .35	
*671	ORNATUS, early flowering, very popular for winter forcing as well as for naturalizing and gardens, cup yellow with scarlet margin	.50	4.25
*672	PHEASANTS EYE (RECURVUS), for outside clumps and borders	.45	4.00
*673	Sarchedon, new, tall, snow-white perianth, large red cup,	each .12	

Grow Daffodils for Winter bloom.

Double Daffodils

In this group are placed all double forms, no matter what their individual classification may be. Some are Trumpets, some Incomparabilis, etc.

		Per 10	Per 100
680	ALBO PLENO ODORATO, double pure white, sweet scented, for outdoors only, not for forcing, late, shy bloomer first year	\$.55	\$5.00
681	Argent, semi-double flower, creamy white petals with yellow centre, early, robust55	5.00
*683	Cheerfulness, double Poetaz, white, yellow centre, very decorative variety on slender stems75	6.50
684	Daphne, a double sport of Poet-Ornatus, resembles a Gardenia, all white	each .12	
686	Holland's Glory, new, acclaimed the best double Daffodil, a double row of petals, double triangle trumpet	1.10	10.00
*688	Irene Copeland, double, white and creamy-white, each .20		
689	Mary Copeland, white, deep orange centre	each .70	
692	Twink, primrose white, deep orange-red centre, very striking and showy	each .20	
	VON SION (Telemonius Major)—without doubt the greatest favorite amongst the double Daffodils; large yellow trumpet.

694	First Size, double nose bulbs, producing likely 2 flowers	.55	5.00
695	Large single nose bulbs, producing 1 flower45	4.00

Jonquils and Campernels

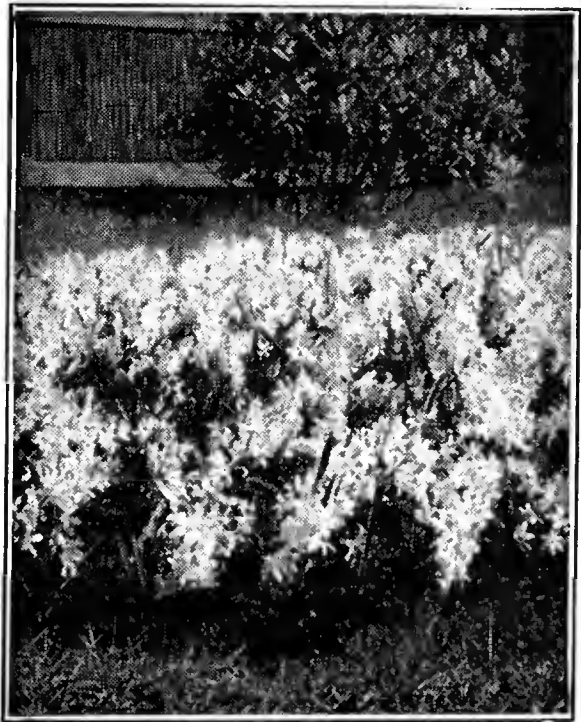

In this group are placed the rush-leaved, sweet scented Narcissi. They bear from two to five flowers in a cluster.

		Per 10	Per 100
700	Single Jonquils, sweet scented	\$.45	\$3.75
704	Campernel Odorus Regulosus, fine yellow45	4.00
705	Hybrid Golden Scepter, very large perianth and crown of deep yellow75	6.50

VARIOUS BULBS

Chionodoxa

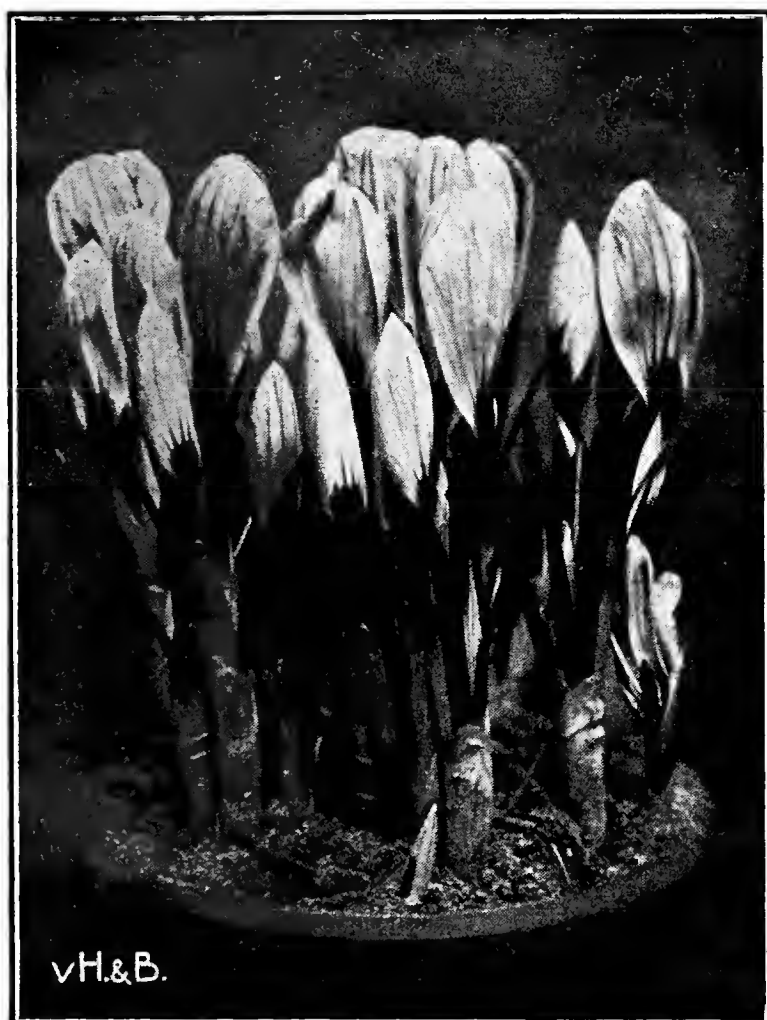

As the name, Glory of the Snow, suggests, blooms early in the Spring. Their blue flowers appear at the same time as the Snowdrops and Siberian Squill. They are borne in sprays on stems five or six inches long. The Chionodoxa are perfectly hardy and their bloom last a long time. Any kind of soil seems to suit them. They require no care, appearing year after year without fail. They should be planted in clusters in rock gardens, about shubbery and in borders. For Winter bloom they may be grown in pots like the Crocuses and Grape Hyacinths.

“Have had every satisfaction with your bulbs these five years”.

830	Superfine Mixture, all blue20	1.50

Crocuses

The Crocus is a general favorite amongst the Dutch Bulbs, because of its bright showiness in the Spring. They are very hardy, do not deteriorate and may be left undisturbed for years. They make a fine show naturalized in lawns. In this case the tops of the Crocus must have time to ripen before the grass is cut. Plant Crocuses in clusters, covering the bulbs with about three inches of soil. For the earliest bloom in the Spring, plant as early in the Fall as possible. The varieties marked * can be forced for Winter bloom, but slowly and in very moderate temperature. They may be planted in earth, or, in Dutch fashion in fancy bowls filled with water and stones. Leave Crocus in a temperature of 40-50° until the first bloom appears, then they will stand warmer temperatures.

Eranthis or Winter Aconite

The Winter Aconite is one of the earliest and hardiest of the early Spring flowers. The pretty golden-yellow, buttercup-like flowers appear before the snow goes away about the time of the Chionodoxa bloom. They continue to flower for several weeks. The plants have shining green leaves and are about six inches high. The bulbs are only about the size of a large pea and should not be planted more than an inch or so deep. They naturalize under trees or about the shrubbery and enjoy moist situations. The bulbs can be forced for indoor Winter bloom.

		Per 10	Per 100
880	Eranthis Cilicica, yellow flower, bronze foliage	\$.25	\$2.00
881	Eranthis Hyemalis, bright yellow, very early25	1.75

" . . . Our order of bulbs arrived yesterday. The bulbs were in excellent condition. We are well satisfied with the quality, especially the trumpet Daffodils, the size of which is AMAZING. . . ."

October 19th, 1938.

MAXWELL McLEAN.

Always name substitute parcels in late ordering.

Fritillaria

The best known of this branch of the Lily Family are the stately Crown Imperials (Fritillaria Imperialis) which bear their flower-ringed clusters at the top of the two or three-foot plant. They should be planted in a place where the tall plants will not be exposed to winds and where they may remain undisturbed for a number of years. The stem should not be cut off but allowed to mature naturally. The Guinea Hen Flower is Fritillaria Meleagris. It is a dwarf form with pendant bell-shaped, oddly marked flowers. Fritillaria bulbs should be planted in small clumps about five or six inches deep and should have a deep mulching of leaves or coarse manure for protection before freeze-up. The bulbs may be forced for indoor or greenhouse display.

Grape Hyacinths (Muscari)

This is one of the daintiest of the Spring flowers. The inverted clusters of little flowers look somewhat like a miniature bunch of grapes, hence their name. They are closely akin to the true Hyacinth. The small rich blue or white flowers clustering on their six to eight-inch stems make a delightful show. Grape Hyacinths are particularly adapted to growing in borders, about shrubbery, along paths, streams, or scattered about the lawn. They multiply abundantly and persist indefinitely without any care. They seem to be suited to any soil or any conditions. Cover the bulbs about two inches and plant in clus-

Muscari do very well here. They make a fine early show.

GRAPE HYACINTHS (Muscari) (Continued)

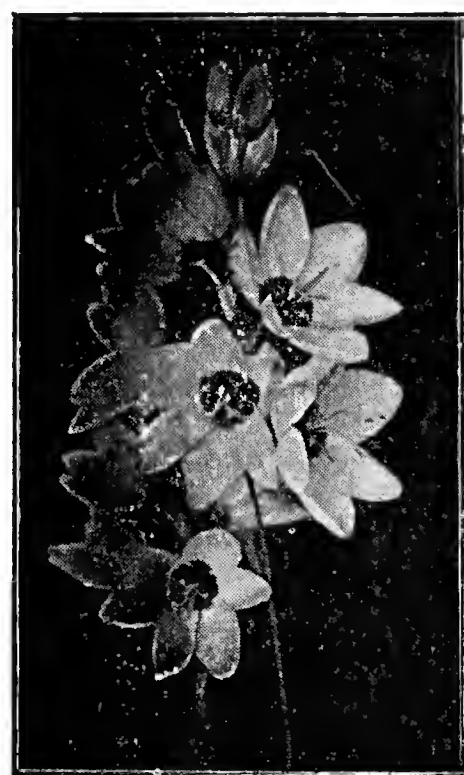

ters. For indoor Winter bloom they should be handled like Crocuses. As with most forced bulbs, color may be less intense than the natural coloring when grown outdoors. A six-inch pot will hold a dozen bulbs.

Ixia

The Ixias are also known as the African Corn Lily. They are natives of the Cape of Good Hope country and are well suited for winter blooming indoors. They should be forced at a low temperature. The flowers are borne in graceful spikes of white, pink, rose, orange and red colors. The centre of the flowers is always characterized by a striking "eye" which contrasts noticeably with the other color of the flower. Six or ten bulbs can be planted in a six-inch pot or pan. When planted outdoors give them good winter protection.

		Per 10	Per 100
950	Superfine Mixture, all colors represented	\$.15	\$1.25
951	Parcel of 100, in 10 named varieties, full range of colors		1.75

Lilium

There are only two Lilies, the bulbs of which are matured sufficiently to permit shipping with the Tulips, etc., in the Fall. Lilium Candidum—the White Madonna Lily is quite hardy for outdoor growing and should have a half-shady, moist position such as in a shrub border. Protect with leaves or coarse manure for the Winter. It can be forced also for Easter or early Spring bloom. Excelsum is used mostly for outside. For other lilies, inquire from our office.

		Per 10	Per 100

956	Lilium Excelsum (Testaceum or Nankeen), beautiful apricot color, flowering June to July	each \$1.00	

Write for prices on large quantities.

Scilla

Few flowers make a brighter show in the early Spring than the various Squills. They are also called the Wood or Star Hyacinths. They are quite hardy. Their flowers are white, blue, rose and red. For Winter bloom indoors, treat them in the same way as Crocuses. Give them about six weeks in the cellar to root. A five-inch pot will hold about a dozen bulbs. Garden Scillas are improved varieties of three native species named Siberica, Campanulata and Nutans. Scilla Campanulata is the common Bluebell of England.

Snowdrops (Galanthus)

The Snowdrop is an old-time favorite of the early Spring. It does not wait for the snow to disappear to display its attractive white flowers. There is a double form as well as a single. The bulbs should be covered with about two inches of soil and left undisturbed from one season to another. They seem to prefer a somewhat sandy soil. They are suitable for planting in clumps amongst shrubbery or in flower beds and borders. Very few places come amiss to them. They can be grown in lawns and wild places. If grown for indoor bloom they should be brought forward at a cool temperature. A five-inch pot will hold about ten or twelve bulbs.

		Per 10	Per 100
985	Single Snowdrops (Galanthus Nivalis Simplex)	\$.25	\$2.00
986	Double Snowdrops (Galanthus Nivalis fl. pleno)35	3.00
